17.2 - 18 10. 11. 2026

Hormones →

① ~~Identf~~ Identify the 3 major classes of hormones on the basis of chemical structure

② Compare & contrast intracellular & cell membranes hormone receptors

③ Describe signaling pathways that involve cAMP & IP3

④ Identify several factors that influence a target cell's response

⑤ Discuss the role of feedback loops & humoral, hormonal, & neural stimuli in hormone control

hormone → binds ~~to~~ to the receptor (specific)
may float → passive in bloodstream?

Regulation of body by hormones →
responses contribute to human reproduction, growth, & development of body tissues, metabolism, fluid, & electrolyte balance sleep.
