Leukocytes & Platelets

- describe - characteristics of leukocytes
  classify leukocytes → according to their lineage

The leukocyte → WBC → invading microorganisms
DNA mutations → clean up & debris →

Platelets- are essential for the repair of blood vessels when damage to them has occured; they also provide growth factors & healing repair.

~~Character~~ Characteristics of Leukocytes

Although L. WBCs & RBCs both originate from hematopoietic stem cells in the bone marrow →

~~WCB~~ WBCs are less numerous → 5000 to 10,000 per uL
larger than erythrocytes → (only formed elements)
→ that are fully formed cells - i.e nucleus → & organelles

There are many types of WBCs

short life spans → for acute infection

One of the most distinctive characteristics leukocytes → movement; leave blood vessels →
A highway → (blood vessels)

When they arrive → called Mac Macrophage
