AP

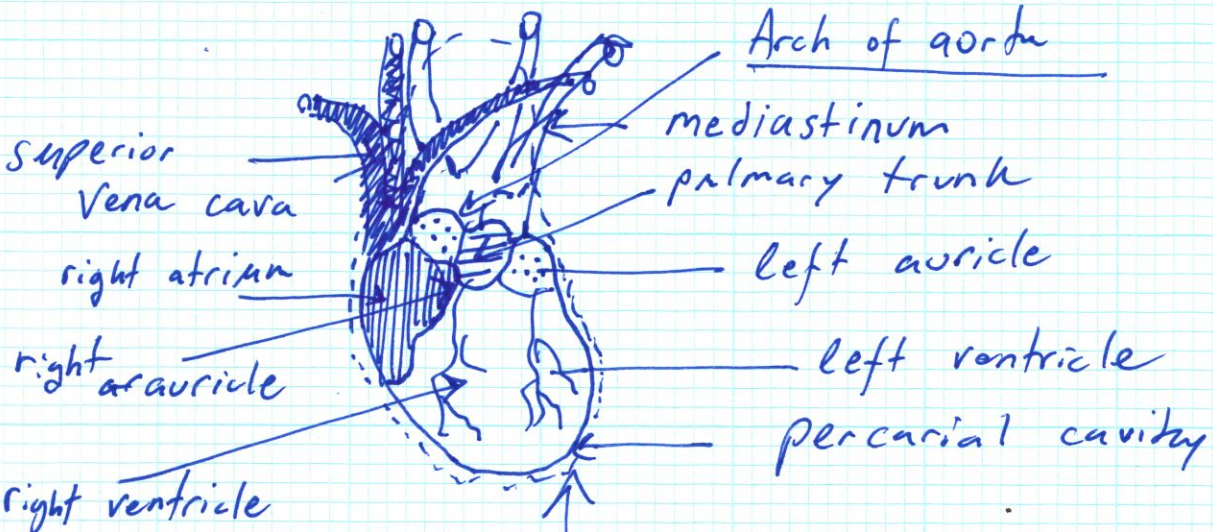

The base of heart is located at the level of the 3rd costal cartilage

~~Infor~~ ± nferior tip of the heart ~~is located at the level of the 3rd~~ is the apex lies left of the sternum ⇒ ~~lie~~ between the junction of the 4th & 5th ribs near their articulation with the ~~cost~~ coastal ~~cartil~~ cartilages

The right side of the heart is deflected anteriorly ⇒ & left side is deflected posteriorly, important to understand position of heart ⇒ looking ⇒ / listening heart sounds

Cardiac Notch ⇒ The slight deviation of the apex to the left is reflected in a depression in the medial surface of the superior lobe

⇒ called the Cardiac Notch

Shape & Size of heart ⇒ is similar to a pinecone

approx the size of fist
