used since ancient Egyptian times

Echocardiam → or simply echo → for abnormal sounds diagnose valve disorders as well as ~~variety~~ variety of health issues.

Coronary Circulation →

cardiac muscles → very active throughout life
requires a reliable supply of O_2
→ it needs a dedicated complex + extensive coronary circulation more O_2 than most muscle cells →

Remember ~~Coronar~~ coronary circulation cycles → is not cont...
Reades peak when heart muscle is relaxed & nearly ceasing while it is contracting.

Coronary Arteries → supply blood to the ~~myo~~ cardium & other components of the heart →

The first portion of the aorta after it arises from the left ventricle give rise to the ~~coronar~~ coronary arteries.
3 dilations in the wall of the aorta just superior to the aortic semilunar valve
Two of these → the left posterior aortic sinus
the right posterior aortic sinus
typically does not give rise to a vessel. Coronary Vessel Branches → that remain on the surface of the ~~artery~~ artery & follow the sulci

These are called the epicardial coronary arteries
