AP (19.2)(3ϕ) 10.16. 2ϕ 26

The components of the cardiac conduction system include the ① sinoatrial node

② atrioventricular node

③ the antrioventicular bundle branches

④ the ~~Purj~~ Purkinje cells

SA Node

~~Sa~~ Sinoatrial Node

a specialized clump of myocardial conducting cells located in the superior & ~~posterior~~ posterior walls of the right atrium in close proximity to the orifice of the superior vena cava

SA Node → Sinoatrial Node has the highest inherent rate of depolarization as the pacemaker of the heart
