3rd degree block →
some impulses are init by the SA node → do not reach the AV node while others do ~~#~~ Also the P waves are not followed by the QRS complex

External Automated & Defibrillators

---

fibcillation → wild uncontrolled electric activity

while ventrical fibrillation is life threatening
defib machines establish a code blue
sinus rythm → the defib stops the heart so that the SA Node can trigger a normal conduction cycle.

FADs - External automated defibrillators

A Heart Block refers to an interruption in the normal conduction pathway
SA nodal block occurs →
SA node is blocked
AV → for AV

Infra-Hisian block involve His
